GS85 All Purpose Cleaner/Refreshener USE PROTOCOL

Extra Strength, Water-stable, Ready-to-Use, All Purpose Cleaner and Fabric Freshener with Residual Features

One spray application of GS85 is all it takes to clean and eliminate odors on surfaces, carpets, fabrics, etc. Its unique, persistent cleaning features help eliminate odors and stains for longer periods of time than any other product of its kind on the market today.

Directions for Use

Removing dirt, grime, grease, kitchen spills and freshening the surrounding air is quick and easy. Use a dry cloth and skim over the surface area to be cleaned to assure the entire surface to be cleaned is DRY. This is a very important starting point. Then, holding the GS85 bottle 4" - 6" away from the surface, lightly spray the area (and surrounding air) until slightly damp. After a few minutes, wipe dry with a clean cloth. For added protection, lightly spray the now cleaned area once again with GS85. Once dry, if any film appears simply wipe with a damp cloth (water only). DO NOT oversaturate. DO NOT spray GS85 directly onto a cleaning cloth; instead, apply directly onto the surface to be treated. A gallon of GS85 treats approx. 400 sq.ft.

Ingredients

Contains water, odor eliminator from citrus, and green stabilizers.

Storage

Store in original, tightly closed container below 86°F and above 32°F. Shelf-life is approximately one year after opening.

There Are Some "Don'ts" to Remember

- Don't spray onto a wet surface ... apply directly to DRY surfaces only.
- Don't spray GS85 onto a cleaning cloth and apply; instead, apply directly from bottle onto the surface to be treated.
- Don't oversaturate.

Should there be questions about GS85, please inquire online at info@goldshield1.com.
